How HBO Works

Viewers often write asking how programs are scheduled. Because we feel this information assures maximum enjoyment of Home Box Office, we try to give frequent explanations.

Movies and specials premiere Friday, Saturday and Sunday Then, for your convenience,

they are shown at different times on four to five days over the next four weeks.

Continued opening runs When shows premiere later in the month, their opening run carries over into the early part of the following month.

One to three showings Each month we encore sev-

eral of the most popular programs from earlier months. These play one to three times during the month.

Program Guide Only highlights appear on the front pages, so be sure to check through the entire guide. The schedule is divided into weekends and weekdays and includes page numbers to find out more about the programs.

It's an Oscar-winning month

We don't know who's going to win the Oscars this year, but we know who's got them this month—HBO. First there's *Rocky*, everybody's favorite underdog and winner of three Academy Awards, including Best Picture. *Bound for Glory* received two Oscars; one for its superb cinematography and a second for Best Musical Score. The spectacular *Man Who Skied Down Everest* was voted Best Documentary, and *All The President's Men* took four Awards; Jason Robards getting Best Supporting Actor. Katharine Hepburn won

her third Best Actress Oscar for *The Lion in Winter*, one of three Awards the film

picked up. It's a tough month to beat, but we've got more in March—beginning with a film that made recent Hollywood history, *One Flew Over The Cuckoo's Nest*. It left the stage with a shopping cart full of Oscars, five to be exact. Among them: Best Picture, Best Actor and Best Actress. Hollywood hadn't seen such a coup since 1934 with *It Happened One Night*. No doubt about it. It's an Oscar-winning month.
